

Subsea Shear Cutter

CUTTING AND GRINDING

Product Number:
TBC

Subsea 7 Shear cutter is used for performing scrap cuts on materials up to 558mm OD (22") for example it can be used to cut various types of structures, rigid and flexible pipelines, umbilical's, tubing, H/I beams and casings. We can perform cuts using both topside control with downlines, or ROV supply using hotstabs. The shear is fitted with multiple rigging points for various horizontal and vertical cutting positions.

- Wide range cutting capability - 0 to 558mm (22") OD
- Vertical or Horizontal cutting arrangements
- Cuts a variety of materials with or without coatings
- Topside or ROV control options available
- Fast cutting times to save on vessel campaign times
- Vertical deployment frame optional
- ROV Hotstab option with intensifier skid optional

Cutting Capacity Pipe	558mm (22") OD
Weight in Air	9500kg
Dimensions	4368 x 2008 x 1746mm
Jaw Opening	978mm (38.5")
	Jaw Depth
Hydraulic Requirements	100 ltr/min @ 350 BAR
